

How to Guide

Installing Cisco Jabber – Android

Supported devices:

Cisco Jabber for Android is officially supported for the following devices, but may still run on other Android devices and OS versions with various limitations.

- Samsung Galaxy S4 with Android OS 4.2.2 and 4.3
- Samsung Galaxy Note II with Android OS 4.1.2
- Samsung Galaxy Nexus with Android OS 4.2.2
- Samsung Galaxy S III with Android OS 4.1.2
- Samsung Galaxy S II with Android OS 4.1.2
- Motorola MC40 with Android OS 4.1.1

Consult the Cisco Support Forums at <http://supportforums.cisco.com> if you encounter issues with unsupported devices.

Instructions for installation

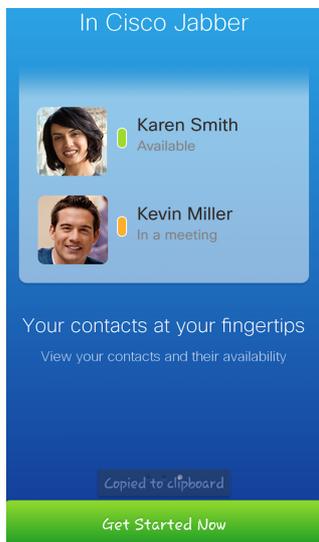

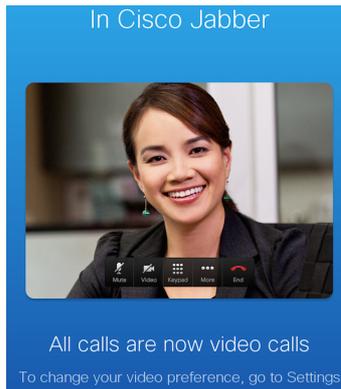

1. Go to Google Playstore

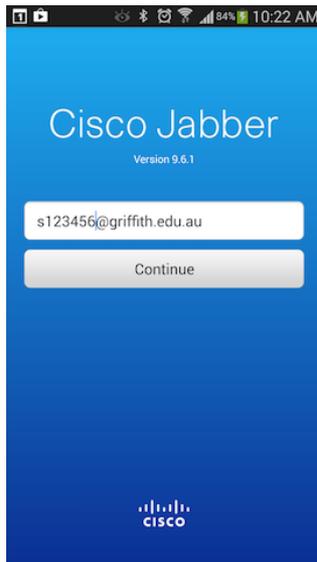

2. Search for Cisco Jabber

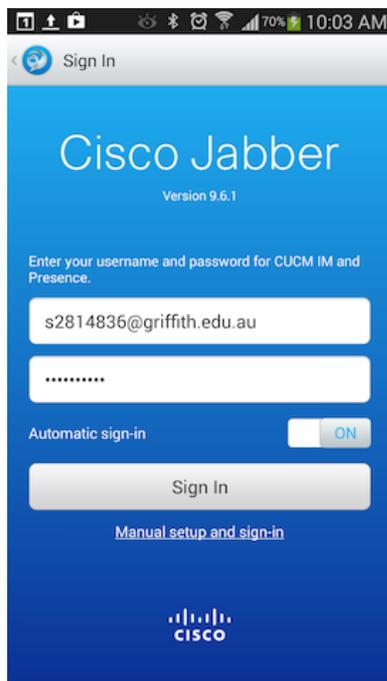

3. Install Cisco Jabber option
4. Open application
